

**Connecticut Society of Eye Physicians
Annual Education Program June 8, 2018
Technicians' Agenda**

- 8:00 **Registration**
- 8:15 **Cornea Ulcers What Are They, Who Gets Them, Where Do They Come From?**
– Jeanine Suchecki, M.D.
Objectives: To describe cornea ulcers describe the reasons patients get them. To review contact lens wearers and the risks of over using them. How to treat them.
- 8:45 **What We don't Know About Macular Degeneration**
– Scott Walter, M.D.
Objectives: To explore some of the areas where treatments are deficient
- 9:15 **Beyond Open and Closed – Distinguishing Causes of Glaucoma**
– Geoffrey Emerick, M.D.
Objectives: To determine causes of glaucoma based on history and clinical features.
- 9:45 **Coffee Break**
- 10:15 **Ocular Imaging update**
– George Williams, M.D.
Objective: To review the current status and utility of widefield imaging, OCT and OCT angiography.
- 10:45 **Presbyopia: The Final Frontier**
– Helen Wu, M.D.
Objectives: 1. To review the currently available methods to address presbyopia 2. To discuss new technologies currently in development for the correction of presbyopia.
- 11:15 **Figuring Out IOL calculations**
– Uday Devgan, M.D.
Objectives: 1. Describe the evolution of IOL calculations 2. Explain which formulas work best for different types of eyes 3. Understand the generations of formulas and how they differ 4. Know the future of IOL calcs and how to best help your patients.
- 11:45 **Lunch Video Symposium**
- 12:45 **What We Have Learned From Clinical Trials**
– Michael Repka, M.D.
Objectives: 1. To understand the value of amblyopia therapy 2. To discuss the appropriate doses for initial therapy. 3. To describe the impact of glasses alone on amblyopia treatment outcomes.
- 1:00 **Advances in Vision Functional Assessment**
– James Tsai, M.D.
Objectives: 1. Understand underlying concepts regarding visual field assessment in glaucoma 2. Learn about innovative technological advances in vision functional assessment (eg, icVEP) in glaucoma.
- 1:30 **Expert Panel – Ask us Anything**
– Lorenzo Cervantes, M.D., Sarit Patel, M.D., Renelle Lim, M.D., Ed Lim, M.D.
Objectives: To field questions from the audience and review questions submitted by experts to audience.
- 2:15 **What Can Go Wrong in Cataract Surgery & What to Look For in Pre-Op Workup**
– Steven Safran, M.D.
Objectives: To review cataract and pre-op information needed for the successful outcomes.
- 2:45 **Coffee Break - Vendor Exhibit Hall**
- 3:15 **A Kaleidoscope of Fascinating Eye Facts - Why what we do is Important**
William Ehlers – M.D.
Objectives: Learners will: 1. Better understand the complexity of the visual system. 2. Understand the importance of vision to our survival, success, and enjoyment of life. 3. Appreciate the importance of eye care in assuring good vision throughout our lives.
- 3:45 **Childhood Eye Diseases and Conditions**
– Steven Thornquist, M.D.
Objectives: To review amblyopia, ptosis, conjunctivitis, cellulitis and other conditions young patients present in a clinical setting.
- 4:15 **Post Competency Test Review**
- 4:30 **Certificates and Door Prizes**

This course has been submitted for 6.5 JCAHPO CE Credits
