Virtual Education Program Friday, January 14, 2022 12:00 - 5:30 pm

Technicians' Agenda

- 12:00 **Opening Remarks** - Ed Lim, MD, Moderator
- 12:05 **Diabetic Retinopathy: Preventing the Next Global Epidemic of Blindness**
– Scott D. Walter, MD
Objectives: 1. Understand the rising prevalence of diabetic retinopathy in the United States and around the world 2. Recognize the stages of diabetic retinopathy and the complications that can lead to vision loss 3. Discuss the treatment options for diabetic retinopathy at various stages of the disease.
- 12:35 **Uveitis: The Usual Suspects and the Masqueraders**
– Ninani Kombo, MD
Objectives: 1. Know the symptoms of Uveitis 2. Describe Anterior Segment manifestations of uveitis 3. Know the systemic diseases associated with uveitis.
- 1:05 **Glaucoma Workup for Technicians**
– Kristy Mascarenhas, MD
Objectives: 1. To review essential elements of technician workups for new and returning glaucoma patients. 2. To discuss common mistakes and how to avoid them.
- 1:30 **OCT Findings of Common Retinal Disorders and Pitfalls**
– Nauman Chaudhry, MD
Objectives: 1. To review OCT findings of common retinal and macular diseases seen in everyday ophthalmology practice 2. To identify potentially vision threatening retinal and macular conditions which require urgent intervention 3. To learn to recognize OCT artifacts which may mimic common retinal and macular diseases.
- 2:00 **Complications of Cataract and MIGS (Minimally Invasive Glaucoma Surgery)**
– Amy Mehta, MD
Objectives: 1. Knowing the potential complications of cataract surgery as well as minimally invasive glaucoma surgery 2. Identifying the complications of cataract surgery as well as minimally invasive glaucoma surgery and which patients are at risk 3. Discuss the treatment options for complications of cataract surgery as well as minimally invasive glaucoma surgery.
- 2:30 **OCT Basics and Common Artifacts**
– Soshian Sarrafpour, MD
Objective: 1. Review basic concepts of OCT imaging including scan protocols, different machines, and functionality 2. Review common artifacts OCT RNFL and ways to avoid them.
- 3:00 **Protecting Children's Vision**
– Erin Walsh, MD
Objectives: 1. To define amblyopia and highlight why vision screening is important to detect risk factors leading to amblyopia 2. To detail subtle non-verbal cues that may indicate a child has amblyopia.
- 3:30 **Refreshment Break Sponsored by Regeneron**
- 3:45 **A Practical Approach to the Patient with Dry Eye**
– Jules Winokur, MD, MBA
Objectives: 1. To understand the basic physiology of Dry Eye Disease and associated conditions 2. To enable participants to administer the appropriate tests in patients with Ocular Surface Disease 3. Discuss the treatment options for Dry Eye Disease.
- 4:15 **Overview of Vitreoretinal Surgery**
– Patrick Coady, MD
Objectives: 1. This course will go through the indications and treatment of a series of retinal conditions using case examples and showing video to illustrate what occurs during vitreoretinal surgery. This is meant to give the technicians an idea of what type of procedures their patients undergo and see what the outcomes are like.
- 4:45 **Covid Vaccination, Treatment, Prevention of Transmission in the Office Setting**
– Mark Russi, MD
Objectives: 1. To review current treatments and preventions for Covid-19 2. To review vaccination requirement policies for employees and describe prevention methods of Transmission in the Office.
- 5:05 **The Other Side of Glaucoma**
– James Martone, MD
Objectives: 1: Discuss factors other than intraocular pressure that can contribute to glaucoma incidence or progression. 2: Describe the visual field changes in glaucoma that would suggest that factors other than intraocular pressure should be investigated
- 5:30 **Certificates and Door Prizes**

This course has been submitted for 5.25 JCAHPO CE Credits
